PROFILE

Software Developer adept in bringing forth expertise in design, installation, testing and maintenance of software systems.

EMPLOYMENT HISTORY

Jun 2021 — Present

Frontend Developer, IDE Asia
Remote

As a Frontend Dev, I was assigned to Deloitte company, one of the Big Four accounting organizations and the largest professional services network in the world. and working on one of the Deloitte projects, the B2B Banking system for United Overseas Bank(UOB) Infinity Application.
and what I'm doing here is:
- Develop maintainable, scalable, tested, and well-written web-based applications Enterprise-Level.
- Work seamlessly with the other team in particular Backend, Mobile, System Analysts, Business Analysts & QA teams that come from different countries.
- Maintaining our design system components that will be used throughout the application
- Code review of other dev.
- Doing cool stuff with ReactJs, Redux, Axios, Material UI, and Jest.

Sep 2022 — Nov 2022

Frontend Developer, Teknologi Bangsa Indonesia Development (TBID)
Remote

My role as a frontend developer revolves around translating business concepts into code that can be executed in web browsers. I am responsible for developing frontend elements such as layouts, navigation, and user interactions.

Nov 2018 — Feb 2021

Website Administrator, Gonegani
Bandung

As a Website Administrator, I excel in managing websites, uploading product catalogs, updating banners, and handling website orders.

Jul 2017 — Aug 2017

Frontend Developer, Nusantech
Bandung

During my vocational high school internship, I specialized in web development. I excelled in designing visually captivating form layout pages that achieved stunning visualizations. Additionally, I eagerly embraced the opportunity to learn Laravel, a renowned PHP framework. This hands-on experience not only expanded my knowledge of web development principles but also ignited my passion for creating captivating online experiences.

EDUCATION

Feb 2021 — Jun 2021

Hacktiv8 Indonesia

In 4 months of intensive Coding Bootcamp, I immersed myself in an enriching learning experience. Our dedicated instructors not only taught us programming, but also encouraged us to implement our knowledge into practical applications. From learning JavaScript, HTML, CSS, algorithms, and data structures in the first month, to diving into MVC architecture, databases, and object-oriented programming in the second month, we built a solid foundation. In the third month, we focused on creating an impressive web developer portfolio, building single-page applications, and exploring advanced technologies like Socket.IO and Redis. The final month introduced us to cutting-edge technologies such as React, React Native, Redux, MongoDB, and Microservice architecture, along with essential skills like AWS deployment and Code Convention. This comprehensive program not only developed our hard skills, but also nurtured our soft skills.

Graduate with score: 94.08.

SKILLS

Javascript	Jest
React.js	Node.js
Git	ExpressJs
Redux	PostgreSQL

COURSES

Nov 2022	Frontend Developer (React), HackerRank
Oct 2023	NodeJs (Basic), HackerRank
